ProofHub Mobile is a streamlined and optimized version, for smartphones and tablets, of ProofHub's online project management application. Proofhub cloud based to centralize and share project information more securely. Users have access to the latest information from the desktop, iPad or mobile devices. ProofHub helps to better manage communication and collaboration between disciplines & between enterprises.

Clifton, New Jersey - ProofHub announces launch of its mobile version of its Online Project management Software. ProofHub Mobile is a streamlined and optimized version, for smartphones and tablets, of ProofHub's online project management application.

"We had no interest in iPhone, iPad, Android and Blackberry apps. All our efforts have been devoted to a single application that works on all mobile platforms. Indeed, ProofHub Mobile works on almost all browsers and mobile devices (iPhone, Blackberry, Windows Phone, iPad and Android devices (phones and tablets.) In a world where new mobile devices are launched every two weeks, ProofHub makes it possible to its users to use it on any platform and the device of their choice without any hassles." says the ProofHub development team.

ProofHub Mobile helps teams to transmit a complete and accurate view of their project, with access to information throughout the life cycle of the project wherever they need it, in the office, on the ground or on the go.

Proofhub is a Project Management software based on the cloud to centralize and share project information more securely. Users have access to the latest information from the desktop, iPad or mobile devices. ProofHub helps to better manage communication and collaboration between disciplines and between enterprises regardless of their location, project size or complexity. It helps the project team to focus more on the projects rather than on managing costly IT infrastructure.

ProofHub Mobile helps iPhone and iPad users to quickly view Projects update anywhere and anytime. They can add new topics, new Task Lists and Milestones. The users can also add comments on the existing topics or tasks. Marking a task or a milestone as complete or incomplete cannot be further simplified from the way its been built in ProofHub Mobile

ProofHub chose to stand out from the competition by keeping ProofHub Mobile very simple, intuitive and quick so that things that has to be done on the go is done in 1-2 clicks compared to a situation when you have to struggle through to find the tiniest of a thing.

Visit website to subscribe to free ProofHub account. Existing customers of ProofHub can access the mobile version by typing their account URL in their mobile browser.
