

Izatt offers new iPhone Dev Course in Utah with new evening format

Published on 05/27/09

Izatt International today announced a new evening format iPhone Developers Course to be held June 23-27, 2009 at the Larry H. Miller Campus in Sandy, UT. Class will be 6-9:30pm Tue-Fri, June 23-26, plus 8:30-5:30pm Saturday, June 27th. Expert iPhone developers representing prominent iPhone development companies such as Izatt International and Pixio will be covering topics ranging from XCode and Interface Builder to the Accelerometer and Core Animation.

American Fork, UT - Izatt International has announced a new evening format iPhone Developers Course to be held June 23-27, 2009 at the Larry H. Miller (SLCC) Campus in Sandy, UT. Class will be 6-9:30pm Tue-Fri, June 23-26, plus 8:30-5:30pm Saturday, June 27th. This new evening format is designed to serve the working professional without requiring time off work.

Expert iPhone developers representing prominent iPhone development companies such as Izatt International and Pixio will be covering topics ranging from XCode and Interface Builder to the Accelerometer and Core Animation. Price is \$1495 (USD); student price is \$995.

The iPhone course is being offered in response to an increasing demand for smart phone development skills in Utah's 'Silicon Slopes' technology sector. Plus, many are unable to attend Apple's Worldwide Developers Conference (WWDC) in early June, so Izatt is providing an opportunity closer to home.

"As an iPhone application developer, Izatt recognized the need to grow the iPhone app developer skill set in Utah. Rather than reaching outside the state for talent, we elected to offer training in collaboration with other iPhone development shops," remarked Jason Izatt, CEO of Izatt International. "Our hope is that education opportunities like this will generate increased entrepreneurial activity and keep Utah on the forefront of technology innovation."

Izatt has been offering such courses since January 2009. These courses have included a 3-day iPhone SDK course, a 2-day 3D iPhone Gaming course, and a 1-day Beginning Objective-C course. Many former students now have apps of their own in the iTunes App Store, have started companies of their own, or have found new employment doing iPhone development.

Information on the iPhone Development Course, including cost, curriculum and pre-requisites can be found on the Izatt International website.
