

MCE Ships USB Super-BluDrive for Mac: Blu-ray Player and CD/DVD Recorder

Published on 06/06/13

MCE Technologies, LLC today announces that it is now shipping its USB Super-BluDrive. The USB Super-BluDrive is a lightweight, portable, slot-loading drive that connects via USB and can play and record CDs and DVDs as well as play commercial Blu-ray movies directly on the Mac with the included software. The USB Super-BluDrive is compatible with all Mac systems. The USB Super-BluDrive retails for \$79.00 USD and is available immediately

San Dimas, California - MCE Technologies, LLC (MCE) today announces that it is now shipping its USB Super-BluDrive. The USB Super-BluDrive is a lightweight, portable, slot-loading drive that connects via USB and can play and record CDs and DVDs as well as play commercial Blu-ray movies directly on the Mac with the included software. The USB Super-BluDrive is compatible with all Mac systems including current and previously shipped iMac, MacBook, MacBook Pro, MacBook Pro with Retina Display, Mac mini, MacBook Air and Mac Pro systems. The USB Super-BluDrive retails for \$79.00 and is available immediately.

"The USB Super-BluDrive gives Mac users a solid alternative to the Apple USB SuperDrive by providing the same functionality but with the added bonus of giving users the ability to watch Blu-ray movies directly on the Mac... and, unlike Apple's drive it's compatible with all Macs," stated Arnold Ramirez, president of MCE. "It is truly stunning to watch Blu-ray movies on the ultra high resolution displays of the MacBook Pro with Retina Display and iMac widescreen display."

The MCE USB Super-BluDrive includes Mac Blu-ray Player software for the playback of commercial Blu-ray movies natively on the Mac. Commercial Blu-ray movie playback requires an Intel Core 2 Duo processor running at 2.4GHz, or faster, and at least 2GB of RAM. The drive is compatible with Apple's DVD Player application for the playback of DVD movies as well as with Finder Burning for burning DVDs and CDs from the desktop. The drive can be used for installing system software and applications, is bootable, and is fully compatible with all DVD and CD recordable media on the market today and can record to standard DVDR media at up to 8X (11MB/sec) speed, to DVDR+/-DL (Double/Dual Layer) media at up to 4X (5.5MB/sec) speed, to DVD+/-RW at up to 6X speed, to DVD-RAM at up to 5X speed, and to CD-R and CD-RW media at up to 24X speed. The USB Super-BluDrive is compatible with all Macs with USB 3.0 or USB 2.0 ports.

Pricing and Availability:

The MCE USB Super-BluDrive is \$79.00 USD and includes Mac Blu-ray Player software, user guide, and a blank DVD-R disc. More information may be found online at the MCE Technologies website.
