

Kdan Mobile Launches Complete Macintosh File Management Solution

Published on 06/11/13

Kdan Mobile today launches a complete file management system, PDF Reader 1.0, in the Macintosh market that includes a proprietary reading engine, a full-fledged file tagging system and a comprehensive set of editing tools. PDF Reader aims at complementing the pre-installed Preview on Macintosh computers. PDF Reader provides an easy interface to help users organize, categorize, edit and transfer files and makes a well-rounded PDF file manager, annotation marker, and page editor.

Huntingdon, Pennsylvania - Kdan Mobile today launches a complete file management system in the Macintosh market that includes a proprietary reading engine, a full-fledged file tagging system, and a comprehensive set of editing tools. In addition to the Company's document managing applications that have a cumulative of 10 million plus downloads in the iOS market, Kdan Mobile brings its innovative technology to the Macintosh market. In responding to the growing market demand for file management solutions, Kdan Mobile's PDF Reader provides an easy interface to help users organize, categorize, edit and transfer files. Kdan Mobile's PDF Reader makes a well-rounded PDF file manager, annotation marker, and page editor.

Mac users are never short of choices when it comes to document reading solutions; but there is a limited selection of file management systems. Aiming at a market of users that have constant needs to handle digital data; PDF Reader's proprietary technology on file management assists users to assign tags, edit PDF files and backup files online via iCloud and Dropbox. "We are providing an ultimate file solution to fix what Mac's Preview doesn't offer. You can now skip rummaging files through emails, files and folders. Our tagging system enables any one to label their files and name their folders according to different uses. Our solution is the first one that focuses on the file management aspect," remarked Kenny Su, CEO of Kdan Mobile.

As Kdan Mobile continues its success in the market of document solutions, the Company has gained wide recognition throughout the iOS market. Kdan Mobile's PDF Reader for iPhone and iPad were featured as "Best of 2012 -Top Paid Apps" and "10 Essentials" in Utility apps. Now the Company delivers its proud innovation to the Mac App Store. "PDF Reader is not a mere file reading app. Mac's Preview provides the basic functions whereas our PDF Reader delivers a thorough file management experience", commented Su. "Customer experience and support is of utmost importance in our mission. We stand by our products. We will be rolling out essential updates of PDF Reader to make it stand as a must-have tool for Mac users," added Su.
