Saint-Petersburg, Russian Federation - New eWeather HD 2.9 app puts everything you need to know to prepare for a summer season - in the palm of your hand. Using data from the NOAA, eWeather HD displays both radar and satellite images, beach water temperatures, tornado and thunderstorm weather alerts and much more.

eWeather HD has just been updated with a slate of new features that will make your outdoors easier and safe.

Summer is the time of year when many things change - including the weather. Thunderstorms cause most of the severe summer weather. They can bring lightning, tornadoes and flooding.

New eWeather HD provides access to the most relevant Weather Forecasts and Weather Alerts for the United States, Europe and Russia. Prepare for storms, floods, and tornadoes as if you know in advance they are coming, because in the summer, they very likely will.

Summer is a great time to travel. In reality trying to take a vacation without planning ahead rarely works out that well. This is especially true if you are going to another country.

Discover your best beach vacation spots with eWeather HD ! The iPhone and iPad app provides all of the necessary information about weather and water on worlds popular beaches and resorts. Explore unique interactive map to find the best place to spend a vacation.

Some of new app features include:

- * Plan a beach vacation with perfect weather with eWeather HD. Now the app reports the water temperature at your favorite beach and at other beaches around the world: Mediterranean coastline, Seychelles, Maldives, Tahiti, Hawaii and others.
- * Use animated cloud cover map (U.S. only) and local UV Index to estimate how long you have in the sun before skin damage occurs.
- * Get a push-notifications with five new sounds whenever severe weather is coming to your location
