

## **Noodlesoft Releases Hazel 3.1**

Published on 06/19/13

Noodlesoft releases Hazel 3.1 for Mac OS X. Hazel is a housekeeper for your folders and files. Using Hazel's powerful rule engine, you can easily create workflows that keep your files organized automatically. Hazel also features options for managing your Trash and includes an intuitive application uninstaller. Hazel 3.1 adds the ability to upload files to remote servers and to match or extract text and data from file contents.

New York, New York - Noodlesoft today is proud to announce the release and immediate availability of Hazel 3.1 for Mac OS X. Hazel version 3.1 introduces new features and improvements, adding the ability to upload files to remote servers using FTP, SFTP or WebDAV. Also, version 3.1 now has the ability to use patterns to match and extract the contents of files allowing users to sort and rename files using dates and other text inside their files.

Other features include improved date matching/extraction, optional notes that can be attached to rules and additional options for moving and copying files. In addition, Hazel 3.1 provides numerous performance improvements and fixes.

### About Hazel:

Hazel is a housekeeper for your folders and files. Using Hazel's powerful rule engine, you can easily create workflows that keep your files organized automatically. Hazel also features options for managing your Trash and includes an intuitive application uninstaller.

### System Requirements:

Hazel 3.1 requires Mac OS X 10.7 or later.

### Pricing and Availability:

Hazel 3.1 is available for download now and features a 14 day free trial. This update is free for existing registered users. Hazel has a retail price of \$28 (USD) and can be purchased from Noodlesoft.
