

Easy Database for iPad

Published on 06/24/13

MICOM Software introduces Easy Database 1.0 for iPad. Database programs are extremely useful and can help users organize stuff, but they can be a pain to setup. Sometime all users want to do is just start entering information, but setting up the database, defining the fields and learning how to use a database app is overwhelming, so users just give up. Easy Database is ready to go. Users just choose the type of database and start entering information right away.

Cromberg, California - MICOM Software introduces Easy Database 1.0 for ipad. Easy Database is a very easy to use database app. There are 10 predefined databases. Use one or all databases. Just choose your database and start filling in information right away! You don't need to worry about setting up field types and labels.

There are 10 different databases to choose from:

- * Custom database
- * Inventory database
- * Software inventory
- * Wine inventory
- * Record inventory
- * CD inventory
- * VHS inventory
- * Tool Inventory
- * Book Inventory

Each inventory has predefined names that are related to that category. Instructions are built into the app so they are always for you to read. The Custom database allows you to define the field names. This can also be done in almost any language.

Note: If you are an experienced database user and well versed in databases this app is not for you, so please don't buy it. You will be unhappy with how easy to use and the lack of 50 different ways to manipulate a database. But thats the beauty of this app. its easy to use! However, Easy Database will let you e-mail a coma delimited file of any or all databases. This way you can import the database into a PC or Mac database or spreadsheet program.

Language Support:

English, German, Northern Sami, Spanish

Device Requirements:

- * Requires iPad with iOS 5.1 or later
- * 3.8 MB

Pricing and Availability:

Easy Database 1.0 is \$1.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the productivity category.
