

1Password touch 2.0 for iPhone and iPod touch gets largest upgrade yet

Published on 06/01/09

Agile Web Solutions has released 1Password touch 2.0 for iPhone and iPod touch, the most significant software upgrade since its original release in July 2008. 1Password touch 2.0 now allows users to securely synchronize their Wallet items like credit cards and software licenses with the desktop version of 1Password for the Mac. In addition, new sync, help, and feedback features give users a more convenient and secure 1Password touch experience.

Toronto (Ontario, Canada) - Agile Web Solutions today released 1Password touch 2.0 for iPhone and iPod touch, the most significant software upgrade since its original release in July 2008. 1Password touch 2.0 now allows users to securely synchronize their Wallet items like credit cards and software licenses with the desktop version of 1Password for the Mac.

The completely redesigned Wi-Fi Sync feature of 1Password touch 2.0 and 1Password 2.9.16 on the desktop makes syncing easier and automatic, so users are never left without their vital Logins, Wallet items, and Secure Notes. Wi-Fi sync history records may now be e-mailed, and an in-app feedback feature allows users to contact Agile Web Solutions directly from their device. Finally, a brand new online help section makes it easy to learn on-the-go about all the benefits of using 1Password touch.

What is 1Password?
