

Michael A. Clasen Consulting Releases Version 1.0 Beta 5 of ContactZ

Published on 07/02/07

MacConsulting today announced the release of version Beta 5 of ContactZ(TM) for FileMaker Pro. Ten years in the making, this product was previously released as MacContacts and now has been completely rewritten to maximize the features in the latest release of Filemaker Pro. Contactz(TM) is a command center for small business. A single or multi-user program that functions as a Business Activity Center, Contactz(TM) manages all of a company's communication needs.

FOR IMMEDIATE RELEASE

Walnut Creek, CA - Friday, June 29, 2007 - MacConsulting, a FileMaker Business Alliance Partner, today announced the release of version Beta 5 of ContactZ(TM) for FileMaker Pro. Ten years in the making, this product was previously released as MacContacts and now has been completely rewritten to maximize the features in the latest release of Filemaker Pro.

Contactz(TM) is a command center for small business. A single or multi-user program that functions as a Business Activity Center, Contactz(TM) manages all of a company's communication needs in one easy-to-use database management (DBMS) system that keeps track of the many tasks that a business requires.

Available in standalone versions for Mac and Windows using Filemaker Runtime Engine, no additional software needed as well as a full Filemaker version for Single and Multi user systems. Truly cool software.

Key Features Include:

- Contact Management
- Multiple Addresses
- Multiple Emails
- Followup Dates
- Notes with Ticklers
- Email to One
- Email Blast to Many
- Extensive Notes & Tasks Management
- Kwikfind(TM)
- Communications Center
- Project Management
- Labels & Envelopes.
- Communications Logs
- Easily Export to Excel & PDF
- Single & Multi User System
- Tracks Payment & Fees
- Manage Project Photos
- Digital Document Library
- Easily Customized
- Special Features:
- Manage Email Campaigns with Message Masters System and complete logging for tracking
