

Rediscover the Joys of Voice with VoiceBo

Published on 07/17/13

Fast Track Technologies today is proud to announce updated VoiceBo 1.0.8 for iOS. VoiceBo's reliance on individual voices brings an air of authenticity to all of its content, creating a highly personal experience. The platform is a perfect tool for those looking to cultivate an audience, or to communicate with others directly - an ideal platform for journalists, bloggers, artists and just about anyone else who wants to communicate more effectively and personally online.

New York, New York - Return to basics and get reacquainted with the authenticity of human voice with VoiceBo. A reactionary turn from the isolation and inefficiency of texting and email, VoiceBo is more than just a voice messaging platform, it's a community of real individuals from a colorful mix of backgrounds - sharing their ideas, dreams, interests and more through simple voice clips. Now, anyone can explore a world of engaging content and even contribute their own insights from their mobile device or desktop computer.

VoiceBo's reliance on individual voices brings an air of authenticity to all of its content, creating a highly personal experience. The platform is a perfect tool for those looking to cultivate an audience, or to communicate with others directly - an ideal platform for journalists, bloggers, artists and just about anyone else who wants to communicate more effectively and personally online. Users simply record a short voice clip of 5 minutes or less, called a "VoiceBo", and instantly upload their content to their personal feed. Those who prefer to explore VoiceBo's can stay in the know by following the feed of their favorite users or searching through VoiceBo's according to hash tag. Moreover, VoiceBo's can be shared outside the platform and across the globe via Facebook, Email, or Twitter.

"Typing can be very time consuming and often unproductive, yet speech is man's most natural and effective form of communication," said Brett Wilson, CEO of Fast Track Technologies LIMITED. "VoiceBo is a manifestation of this return to speech, a new way for people to share their personal content with an eager community of users who are keen to rediscover audible content and entertainment. From news shorts and investigative pieces, to personal anecdotes, stories and even songs, VoiceBo is the place to hear it all rather than the limitations of 140 characters of text."

VoiceBo Update Features

- * Create and Share VoiceBo's almost instantly
- * Flexible publishing capabilities allow for Direct or Public sharing
- * Follow other users, Like and Comment on VoiceBo's and more
- * Leave VoiceBo messages from anywhere across the globe
