

TRYPTpic 1.1 makes New and Noteworthy photo category in App Store

Published on 07/26/13

Denver based independent developer, Josh Granville announces TRYPTpic 1.1, an update to his photography app for iOS. Offering a brand new way to share content on Instagram, TRYPTpic crops one photo into multiple related panels and uploads them sequentially to create a larger display area using the entire grid view of the profile. The panels combine to form one large, single image. The update caught Apple's eye and it's been featured in the New and Noteworthy list.

Denver, Colorado - Independent developer, Josh Granville has announced the release of TRYPTpic 1.1 for iOS, offering a brand new way to share content on Instagram. The new update caught the eye of Apple, and they have featured TRYPTpic in the New and Noteworthy photo category! Tryptpic crops one photo into multiple related panels and uploads them sequentially to create a larger display area using the entire grid view of the profile. In the profile view, the panels combine to form one large, single image. Now photos can get the space they deserve, panoramas will not be shrunk too small to see, and your Instagram feed looks unique.

The triptych is as old as the Renaissance, as still has the ability to create drama, action, and beauty through split picture framing. Its simple interface includes 6 different panel number choices:

1x3, 2x3, 3x3, 3x4 - all crop choices that are 3 images horizontally can be uploaded through the Instagram interface in the app.
1x2 and 2x2 panel choices can only be saved to camera roll to manually upload, as they require other photos to fill the blank spaces created.

This style of "collaging" is referred to with hash tags as multiple of three frames, super panorama, mosaic feed or grid view, and was previously accomplished by using Photoshop. With TRYPTpic, it can simply and quickly be done using only one's iPhone, iPad, or iPod.

Device Requirements:

- * iPhone, iPod touch, and iPad
- * Requires iOS 5.0 or later
- * 4.1 MB

Pricing and Availability:

TRYPTpic 1.1 is \$1.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the Photo & Video category.
