

Easy Pill 3.0 for iOS: Advanced Daily Pill Tracker and Reminder

Published on 08/07/13

BirdsCorp today announces Easy Pill 3.0 for iOS, an update to their Medical app that offers advanced, daily medication tracking and reminding when to take next pill. Users can select any dosing frequency and duration, including "as needed," and dosing times can also be edited or shifted when necessary. Version 3.0 features all-new design, new Due Today view and unique system to build medication schedule online and import it to the app via email or by scanning QR code.

Tomsk, Russian Federation - BirdsCorp today is proud to announce the release of Easy Pill 3.0 for iOS, an update to their Medical app in new bright and clean design that offers advanced, daily tracking of all pills, capsules, and other medication with iCloud support for automatic sync between all the user's iDevices. Featuring a daily list of medications by name with color-coded pill graphics, the app's easy to use GUI and automatic notifications make it easy to take pills on schedule. Users can select any dosing frequency and duration for each drug, including "as needed," and the time for doses can be entered easily via the app's unique, 24-hour Set Schedule grid. Especially convenient is Easy Pill's "Every X Hours" mode, where the app will automatically adjust dosing times based on when the first dose of the day is taken.

The app displays all pills for a day sorted by medication name or alternatively in a Due Today view, where all doses are sorted by time and grouped for convenience into four parts of the day - night, morning, afternoon, evening.

Easy Pill is the only pill tracker that manages medication as a course. The course duration can be set from 1 day to 1 year or taking constantly. The app displays elegant progress bar to see how close is the course to finish. Completed pills are moved to archive automatically - all past prescriptions will always be available at a glance. It's possible to email archived medications or repeat the course.

Feature Highlights:

- * Robust notifications - no internet connection required
- * Fast pill setup in just a few taps
- * Visually edit pill schedule by tapping and moving dose time
- * Visually see your pills for a day
- * Fast take dose action - just single tap on your pill
- * Due Today view - see all scheduled doses for today grouped and sorted by time
- * Track remaining doses
- * Unique privacy settings: ability to change alert message and passcode protection
- * Repeating reminders and ability to choose one of 15 sounds including 5 long ones
- * Archive to store finished pills and repeat courses
- * Ability to email your current or archived drug list
- * Quick link to search your pills in Safari
- * iCloud sync between your iOS devices (iOS5 and later)

BirdsCorp is pleased to introduce their new support website featuring unique system to build medication schedule online and import it to Easy Pill app via email or by scanning QR code.

"We made a big update trying to meet most of requests we collected from our users during the past few months," commented Dmitry Polyankovskiy of BirdsCorp. "many new features were added but Easy Pill is still very easy to use as it was since first version: entry, notification, lookup, and sync are all so easy that users of any age and experience will love this app."
