

A Better Finder Rename 9.24 now displays non-printable characters

Published on 08/14/13

publicspace.net has released A Better Finder Rename 9.24, an update to the leading file, photo, video and music renaming utility on the Macintosh. A Better Finder Rename is a sophisticated tool that caters for the full range of file renaming tasks encountered by the modern creative professional. Its streamlined interface includes an instant preview feature that eliminates guess work and reduces error. This release adds the ability to display invisible/ non-printing characters.

Canach, Luxembourg - publicspace.net has announced the release of A Better Finder Rename 9.24 an update to the leading file, photo, video and music renaming utility on the Macintosh.

A Better Finder Rename has long been the most complete file renaming solution on the market and has transformed the tedious and time-consuming task of renaming multiple files into a simple matter of seconds for tens of thousands of creative professionals across the world. It is based on over 15 years of listening to our users and addressing their requirements to the best of our abilities.

A Better Finder Rename is a sophisticated tool that caters for the full range of file renaming tasks encountered by the modern creative professional. Its streamlined interface includes an instant preview feature that eliminates guess work and reduces error. The tool features capture time and date extraction (EXIF JPEG and most RAW formats) for digital photographers, ID3 tag extraction for music lovers, regular expression support, plain-text file import for renaming from databases and many other advanced features.

The renaming engine is capable of handling very large renaming jobs with ease and it meets file renaming challenges, such as file name conflicts, swaps and dependency cycles that other such tools leave unaddressed, head on. The renaming engine leverages all the latest Mac OS X technologies by using a 64-bit multi-threaded architecture based around the Core Data database system.

Version 9 features a beautiful, re-designed single window user interface, the ability to manually re-order items via drag & drop and access to over 100 image, photo, camera, lens, color, music and date meta-data tags.

Today's 9.24 features the ability to display non-printing/ invisible characters in the file name preview.

"A Better Finder Rename" is ideally suited for creative professionals, digital photographers, web masters, users who need to transfer files from Windows or UNIX, as well as for all other Macintosh users who routinely deal with large numbers of files.
