Sydney, Australia - The third iteration of ControlCraft is now available on your iPod touch, iPad, and iPhone. ControlCraft 3 is a fast paced action-strategy game. Command your troops to attack enemy control points. Utilize a wide range of troops and tactical abilities. During the heat of the battle, tactical decisions of when, where and how to attack will win or lose you the war.

Each level plays fast and the outcome is determined in minutes. But with 48 diverse levels there is enough game to keep any armchair general happy for quite some time. Use five different super weapons wisely to help turn the tide of battle at crucial times. Then take your war strategy to the next level by deciding how to upgrade your troops and super weapons. With the upgrade system being flexible you can adjust your strategy before each level to take into account the map layout and your enemy's strengths or weaknesses.

This iteration of ControlCraft has taken things to next level graphically. With animated level backgrounds, and new suit options for your troops, ControlCraft has never looked so good. ControlCraft 3 continues the tradition of the superb arcade action-strategy that made a modern classic, now available on any of your iOS devices.
