

## **mconnect player free 1.1.1 for iOS-Universal, Network, Multimedia Player**

Published on 08/28/13

ConversDigital today announces mconnect player free for iOS, an update to its universal multimedia player, designed to provide media playback from any source to any device in a network environment. The app lets users stream media files residing on DLNA servers, such as Windows PCs and network storage, directly to iDevices. Media files on PCs and in cloud storage, like Dropbox and SkyDrive, can be streamed via AirPlay Mirroring to home theater systems equipped with Apple TV or other smart TVs.

Seoul, Korea - ConversDigital today is pleased to announce mconnect player free for iOS, an update to its universal multimedia player, designed to provide media playback from any source to any device in a network environment. mconnect player free lets users stream media files residing on DLNA servers, such as Windows PCs, and cloud storage, like Dropbox and SkyDrive, directly to iDevices. In addition to playback on iDevices, media files can be streamed via AirPlay Mirroring to home theater systems equipped with Apple TV, AirPlay compatible speakers, or other DLNA-compatible audio components and smart TVs. This update includes the following: updated UI, playlist management across servers, and micro volume control.

### Feature Highlights:

- \* Universal multimedia player lets users enjoy media playback from any source to any device
- \* New management of music playlists containing music files stored on multiple server devices on the network
- \* Scrollable listings of all Server devices on the network
- \* Scrollable listings of all Play To devices on the network
- \* Scrollable listings of all Cloud Servers available
- \* Scrollable listings of all songs with cover art and quick thumb indexing
- \* Convenient controls, including: Stop, Play, Repeat, Previous, Next, Play Time, and Seek
- \* New Micro Volume Control allows precise digital control from 0 to 100
- \* Playback of media files stored on PCs (Windows XP/7/8), network storage, and cloud storage, such as Dropbox and SkyDrive
- \* Control of streaming media files from your PC, network storage, and cloud storage to DLNA-compatible audio components and smart TVs
- \* Supports streaming to Apple TV and AirPort Express via AirPlay Mirroring
- \* Your mobile device becomes a remote controller for connected devices
- \* Facebook and Twitter sharing
- \* Audio support: MP3, AAC, HE-AAC, WAV, Audible, Apple Lossless, AIFF, FLAC, OGG, WV, OMA
- \* Image support: JPG, GIF, PNG, TIFF
- \* Video support: MP4, MOV, M4V (H.264 BP 3.0, MPEG-4 SP)

In a world filled with media choices, Apple has created exquisitely designed, smart, mobile devices that now play a major role in media consumption. Whether users are enjoying music, photos, or video, the iPhone, iPod touch, iPad, and iPad mini deliver an experience of the highest quality. However, not every home computer, music service, or cloud storage network was designed for maximum compatibility with Apple's iDevices. mconnect player free is the universal, network, multimedia player solution. While Apple streams media via its proprietary AirPlay technology, the Digital Living Network Alliance (DLNA) is a non-profit collaborative that develops guidelines for interoperability between digital media devices. mconnect player free makes iDevices DLNA-compatible, greatly expanding the number of digital media sources available to owners of Apple mobile devices.

According to Young Rae Cho of ConversDigital, "To access media services and digital content anywhere, with any device, is what users want today, and ConversDigital
