

Gunit Solution introduces Album Lock 1.0 for iOS - Latest Security App

Published on 09/02/13

Auckland based Gunit Solution today introduces Album Lock 1.0, its new app developed for iPhone, iPad and iPod touch. Featuring unlimited albums and folders, Album Lock hides your photos, videos and files in a secure hidden database. You can add unlimited photos from your phone and record unlimited videos. Only pay for multi-selection if you have a lot of photos. The app locks itself even if you leave it unattended, and also when the app is not on the screen it's locked.

Auckland, New Zealand - Gunit Solution today is pleased to announce the release of Album Lock 1.0, its new app developed for iPhone, iPad and iPod touch. Album Lock hides your photos, videos and files in a secure hidden database. You can add unlimited photos from your phone and record unlimited videos. Only pay for multi-selection if you have a lot of photos. The app locks itself even if you leave it unattended, and also when the app is not on the screen it's locked.

You need this free app! People are curious, they want to check out your phone. You normally won't say no if they are your friends, however there are certain things you don't want them to see. The photos and videos you took in bed or from your hot dates, the company meeting documents which are confidential and so on. Get this app for free now:

- * Add unlimited photos from your phone and record unlimited videos - Only pay for multi-selection if you have a lot of photos
- * Unlimited Albums and Folders, categorize your secrets
- * Files downloader integrated - Download your files and save them in a secure folder
- * Support almost all document formats - Document viewer is also integrated - Check your files within the app, it's fast and safe
- * Photo gallery and full screen views
- * Fast import photos videos and documents from iTunes available in app purchase
- * Complex or simple 4-digit password protection
- * Self-destruction configurable - The app will delete everything when people try to break in
- * Decoy password - Setup a fake password, only show what you want people to see
- * Auto lock and instant lock - The app locks itself even if you leave it unattended and also when the app is not on the screen it's locked
- * And so much more
