

## **Blue Room Software Birthday Celebration - 50% off everything**

Published on 06/23/09

Blue Room Software announces that BurnToDisc and ImageArchiver export plug-ins for Aperture and iPhoto will be available at a 50% savings for a one day birthday celebration on July 7, 2009. BurnToDisc provides a simple way to deliver your final images to a client, share your pictures with friends and family, or make an extra copy of your files for safekeeping. To take advantage of this sale, simply use the coupon code HAPPYBIRTHDAY at checkout.

Seminole, Florida - Blue Room Software announces that all of its products will be available at a 50% savings for a one day birthday celebration on July 7, 2009. To take advantage of this sale, simply use the coupon code HAPPYBIRTHDAY at checkout.

BurnToDisc provides a simple way to deliver your final images to a client, share your pictures with friends and family, or make an extra copy of your files for safekeeping. Disc names are automatically generated from user-defined elements such as disc number, image number, export date and project name.

With BurnToDisc for Aperture, you have even greater control over disc naming and population. An unlimited number of reusable export templates can be configured to generate multiple image sizes, multiple image formats and on-disc folder placement for the images.

ImageArchiver makes it easy for both Aperture and iPhoto users to export their digital pictures to MacOS X disk images or platform-independent compressed zip, gzip or bzip2 files.

### Minimum System Requirements:

- \* MacOS X 10.4 Tiger or later
- \* Universal Binary for PowerPC G4, G5 or Intel Macintosh
- \* Aperture 1.5 or later / iPhoto '08 or later

### Recommended System:

- \* MacOS X 10.5 Leopard
- \* Aperture 2.0 or later / iPhoto '08 or later
