

## **Contacts Duster Got a Bog iOS 7 Makeover and Released CloudSync**

Published on 10/01/13

The iOS 7 update was something that many people looked forward to. To be in sync with this update, Contacts Duster also got its own makeover. The originally efficient contact management application has been optimized for the new operating system to provide a more seamless user experience. This top application also incorporated the CloudSync feature to its system. CloudSync lets the users synchronize & backup their contacts to restore their address book in the cloud for any of their iOS devices.

Wilmington, Delaware - The all-new iOS 7 for Apple's iPhone, iPod touch, and iPad is boasting of a new perspective and experience for its users. Its all-new design makes an old iPhone look new. It has a simpler design with new features for an easier and quicker multi-tasking. With the newest update on Apple's operating system, there's also a need for applications to be updated for iOS 7. This is the reason why MyClickApps optimized Contacts Duster for iOS 7 users.

Contacts Duster is among the Top 100 applications on the utilities section in the App Store. The app is considered the smartest duplicates cleaner available. This useful contact management app lets the user clean up the duplicate contacts in their devices while merging these details into a single entry. It analyzes the contact information stored in one's device accurately. Users only need to check the app's reports, select which information needs to be merged, and that's it. The reports allow the user to visualize the contact partitions through graphs. De-cluttering one's phone just takes a few taps. Gone are the days when manual checking and deleting entries are needed.

Address book maintenance has just gotten better and easier with the application. Now, email addresses, phone numbers, and names will be organized effectively. It also bundles the different contact entries to different groups accordingly. Importing contact information from the email and other social media accounts will immediately be arranged, as well. It also deletes zombies, like information not belonging to any contacts.

With the newly optimized app, Contacts Duster still provides the same features and usability to everyone. It's not just that, the updated one gives users an easier experience. The new makeover has made its interface simpler and more intuitive for all the users. The One Touch Duplicate Cleaner automatically deletes and cleans up similar entries from email addresses to mobile numbers.

Switching to a new phone is something that one should not be worried about. Contacts Duster is already incorporating the CloudSync feature to backup and save the contact details on the cloud. This is an in-house developed feature specifically made for the application. Moving thousands of phone numbers and addresses is not a hassle anymore. Those who have multiple iOS devices can streamline contacts through the cloud and just synchronizes all the information.

This feature can also be used when switching carriers or upgrading to a new iPhone. Having the Contacts Duster lets one restore all the information and details from one's address book through the in-app restore and backup function. Contacts Duster is the best and most reliable application for cloud contacts backup.

Don't forget to send us your feedback. We appreciate nice reviews in the app store. It will keep us running. Also check out our other apps: FeedsWire, 1- Click Flashlight (with more than 700,000 downloads), A Special Phone, 1-Click Mirror and more!
