Published on 06/25/09

PremiumSoft today releases Navicat Premium, their cross database admin and migration interface for Mac OS X. Navicat Premium combines all Navicat versions in an ultimate version and can connect MySQL, Oracle and PostgreSQL. Navicat Premium allows the user to drag and drop tables and data from Oracle to MySQL, PostgreSQL to MySQL, Oracle to PostgreSQL and vice versa within a single client. Also, batch jobs for different databases can also be scheduled and automated.

Hong Kong - Navicat Premium combines all Navicat versions in an ultimate version and can connect MySQL, Oracle and PostgreSQL. Navicat Premium allows user to drag and drop tables and data from Oracle to MySQL, PostgreSQL to MySQL, Oracle to PostgreSQL and vice versa within a single client. Also, batch jobs for different databases such as create report in MySQL, backup data in Oracle and synchronize data in PostgreSQL can also be scheduled and automated. All in all, Navicat Premium can help database users to save lots of time to manage multiple databases and perform cross database data migration at their fingertips.

This Database Client tool runs on Mac OS X and Windows and features an intuitive interface. Other advanced features including Backup/ Restore, Data Import/ Export, Data Synchronization, Reporting and Remote Connection to MySQL, PostgreSQL and Oracle server, etc. This database migration tool provides a friendly step-by-step Wizard-GUI. Database to Database migration is just a simple 3 steps process: (1) select a data source and (2) select a target output format, then (3) submit migration!
