

## **Slife Labs Releases Slife 1.2, Continues MacBook Giveaway**

Published on 07/11/07

Slife Labs releases Slife 1.2, featuring several performance improvements and a new auto-update engine. Slife Labs is also giving away a MacBook on July 13th. In order to enter the drawing, all users need to do is purchase a Slife license for US\$34.

Slife Labs is pleased to announce the immediate availability of Slife 1.2. Slife is a new application for the Mac OS X that lets users visualize their computer activities, keep track of time and stay in touch with friends by sharing web sites they visit, videos they watch, applications they use and much more.

Slife 1.2 features a new data model, optimized execution of plugins, improved support for any application and a new auto-update engine. "This release is mainly about performance", said Edison Thomaz, Principal at Slife Labs. "We've made improvements in all areas. Slife is faster to launch, uses less memory and consumes less CPU", he added.

Slife Labs also announced that its MacBook giveaway continues. The company will be giving away one 13-inch 2.0GHz White MacBook on July 13th 2007. In order to participate in the drawing, all users need to purchase a Slife license by July 12th 2007. A license costs US\$34 and allows Slife to track an unlimited number of applications at a time. The drawing will be held on July 13th and the winner will be posted on the Slife Labs blog soon thereafter.

### Pricing and Availability

Slife 1.2 for Mac OS X can be downloaded today. Slife can track up to 3 applications at a time for free and an unlimited number of applications with a license. A Slife license can be purchased for US\$34.

### Requirements

Slife 1.2 requires Mac OS X 10.4 (Tiger) or later and at least 512MB RAM (1GB RAM recommended). Streaming activities to a Slifeshare account requires Slife 1.0 or later.
