

SweetP Productions releases Privatus 1.0 for Mac OS X

Published on 11/07/13

SweetP Productions today introduces Privatus 1.0, a new cookie management product for Mac OS X. Privatus revolutionizes Mac OS X cookie management, providing an effortless and affordable solution for online privacy concerns. Privatus removes all tracking cookies, and unnecessary cookies, flash cookies, silverlight, and databases from your Mac, automatically. Built for ease of use, there is nothing to configure, no favourites, no whitelists, no blacklists, no problems. Privatus just works.

Surfers Paradise, Australia - SweetP Productions today is proud to announce the release of Privatus 1.0, a new cookie management product for Mac OS X. Privatus has been designed from the ground up with simplicity in mind. Built for ease of use, there is nothing to configure, no favourites, no whitelists, no blacklists ... no problems! Privatus just works!

Privatus removes all tracking cookies, and unnecessary cookies, flash cookies, silverlight, and databases from your Mac, automatically. You can run it from your system MenuBar, you can even run it headless, Privatus will work silently, and methodically in the background, clearing all unwanted data when you close your browser session. All the major Mac OS X browsers are supported: Safari, WebKit, Firefox, Chrome, Chromium, and even Camino.

All the power of our other popular 'Cookie' app, with none of the setup headaches! Privatus is cookie management for the rest of us! SweetP Productions will also be launching a new dedicated website for Privatus in the coming days, so keep checking back.

Device Requirements:

- * Mac OS X 10.8.5 or later
- * 3.3 MB disk space

Pricing and Availability:

Privatus 1.0 is available at the introductory offer price of only \$7.99 USD (or equivalent amount in other currencies) and available worldwide through the SweetP Productions Store. A 14 day trial version can be downloaded from SweetP Productions online.
