Vancouver, Washington - unmarked software today announces the release and immediate availability of TextSoap(R) 6.2.2, an update to its text processing utility for Mac OS X. The TextSoap 6.2.2 update is a maintenance release that fixes a number of reported issues and adds support for using Services on rich text with images.

Other issues address:

- * Scripting Addition now longer interferes with new agent scripting.
- * Scripting addition command "tsPickCleaner" now uses newer keyboard friendly dialog.
- * Remove Style from Text cleaner now allows text to better adopt surround style information.
- * Changing zoom no longer causes problems under some circumstances.
- * Find dialog improves handling of "ignore case" option when searching with regular expressions.
- * Fixed an issue where some rich text might not be processed under certain conditions.

Supported Languages:

- * US English

System Requirements:

- * Requires Mac OS X v10.5 or later
- * Universal Binary: Works great on both Intel and PowerPC
- * 14 MB hard Drive space

Take total control of text and its style. Whether it is Mail, AppleWorks, BBEdit, or TextEdit, TextSoap provides integration options such as Services Menu support, Shortcut Menu and Application plug-ins. With a single menu selection TextSoap 6 brings unique processing power to users from within their favorite application.
