

Major Speed Download update prepares for next generation downloading

Published on 06/30/09

Yazsoft today announced Speed Download 5.2, a major update to their flagship download manager. Speed Download 5 redefines the Mac OS X download manager by combining four amazing products; a turbo-charged download manager with auto-resuming downloads, a fully featured secure FTP client, a file sharing utility with full encryption, and complete .Mac/iDisk/WEBDAV connectivity into one small and easy to use application. And now with RSS newsreader integration.

Chicago, Illinois - Yazsoft today announced a major update to their flagship download manager, Speed Download, version 5.2. Developed exclusively for Mac OS X, Speed Download

is an easy to use, powerful and reliable download manager. Speed Download sets a higher standard for download manager innovation, and is expressly designed to be a central, unified hub for almost all downloading and file transfer activities.

This major new update continues to enhance and tweak the performance of Speed Download to ensure utmost reliability. Version 5.2 includes tons of key improvements and prepares the ground work for the next generation of turbo-charged downloading.
