

Zevrix File Transfer App Deliver Now Supports Mac OS X 10.9 Mavericks

Published on 11/22/13

Zevrix Solutions announces Deliver 2.4.6, a compatibility update to its automated file transfer solution for remote and local destinations. Deliver lets users send files to FTP, SFTP, Amazon S3, WebDAV and other servers and offers automatic e-mail notifications, delivery to multiple destinations, file encryption, delivery history and other powerful capabilities. The new version makes Deliver compatible with recently released Mac OS X 10.9 Mavericks.

Toronto, Canada - Zevrix Solutions today announces Deliver 2.4.6, a compatibility update to its file transfer solution for remote and local destinations. Deliver lets users send files over Internet and local networks with automatic e-mail notifications, file compression, delivery history and other powerful capabilities. It supports FTP, SFTP, Amazon S3, WebDAV and other remote and local services, and allows to send files to multiple destinations at once.

The new version makes Deliver compatible with recently released Mac OS X 10.9 Mavericks and is offered as a free update to licensed users.

"Deliver gives plenty to like," writes Natalia Nowak on Mac360, a Mac app reviews site. "It's a secure document delivery system with tracking built in, and straightforward and comprehensive user interface."

Deliver simplifies and streamlines file delivery operations of ad agencies, printers, audio recording studios, video producers and legal offices worldwide. Users only need to drop files on the program's icon and they will be delivered automatically to the desired destinations with customizable e-mail confirmations issued upon delivery. Recipients can download the file using a link inserted automatically into notification e-mail.

Deliver offers the following key features:

- * Transfer files to FTP, Google Storage, Amazon S3 and other servers
- * Automatic e-mail notifications
- * Hyperlink to file for instant download by recipients
- * Compress files automatically (.zip/.dmg)
- * Encrypt disk images with passwords
- * Create lo-res PDF on the fly and attach to e-mail
- * Delivery history

Pricing and Availability:

Deliver can be purchased from Zevrix website for \$19.95 (USD). Trial is also available for download. The update is free for licensed users of Deliver 2.x. Deliver requires Mac OS X 10.5-10.9.
