

## **Ergonis Black Friday: Save 30% and more on PopChar, Typinator, KeyCue**

Published on 11/26/13

Ergonis Software is glad to announce a Black Friday shopping event for their popular productivity tools PopChar, Typinator, and KeyCue. With PopChar, thousands of special characters are only a few clicks away. Typinator automates the process of inserting frequently used text and auto-correcting typing errors. KeyCue is a tool for learning and remembering keyboard shortcuts. Customers visiting the company's online store before Monday, Dec. 2nd, can save of 30% and more.

Hagenberg, Austria - It's that time of the year again and Ergonis Software announces a Black Friday promotion for their award-winning productivity tools PopChar, Typinator, and KeyCue.

Customers visiting the company's online store during the Black Friday weekend, i.e., before Monday, December 2nd 2013, can enter the coupon code "BlackFriday13A" during checkout to get a 30% discount. Depending on the number of licenses you purchase, an additional quantity discount is granted. Combined with the Black Friday discount, this allows you to save up to 51%.

PopChar solves a problem faced by every technologist and multi-lingual worker. Inserting special characters into documents can be frustrating and results in a steady loss of productivity. With PopChar, thousands of special characters are only a few clicks away. Just pop up the PopChar window, click the desired character, and the character appears in your current document right away. Starting with PopChar 6, you can even take a new look at fonts from a designer's perspective - see a font preview, and check out what a given text fragment looks like in a certain font. PopChar is available for Mac OS X and Windows.

Typinator is a powerful, yet elegantly simple solution that boosts your productivity by automating the process of inserting frequently used text and auto-correcting typing errors. Across all applications, it detects specific sequences of typed characters and automatically replaces them with text snippets, graphics, URLs, dates and special characters.

KeyCue is a tool for learning and remembering keyboard shortcuts. Whenever the command key is kept pressed for a while, KeyCue displays a table with all keyboard shortcuts available in the currently active application. Over time, KeyCue users will automatically remember frequently used shortcuts and start working more efficiently.

### Availability and Ordering:

Orders can be placed securely on the Ergonis Software online store. For information about purchases, including enterprise licenses, volume discounts, and upgrade pricing offers, see the company's web site.
