

## Shapes And Robot Tracing App Introduces Preschoolers to the World

Published on 11/30/13

Kid's Academy Company today introduces Shapes And Robot Tracing 1.0, its new educational game title for iOS devices. Designed for kids aged 2-6, Shapes And Robot Tracing introduces little learners to the world of geometry and shapes, as well as improves concentration, memory and fine motor skills. Offering 10 different shape patterns to learn, lively music, full voice over and sound effects respond to the child's efforts with positive encouragement and congratulations as appropriate.

Holmdel, New Jersey - Kid's Academy Company today is proud to announce the release and immediate availability of Shapes And Robot Tracing app. Designed for kids aged 2-6, the app introduces little learners to the world of geometry and shapes, as well as improves concentration, memory and fine motor skills.

Toddlers are encouraged to learn about shapes through interactions with engaging animations and sounds. Shapes And Robot Tracing offers 10 different shape patterns to learn (circle, crescent, heart, hexahedron, oval, rectangle, rhombus, square, star and triangle). Every time kids complete an activity, they collect shiny fireflies that can be released in the end of the game. Lively music, full voice over and sound effects respond to the child's efforts with positive encouragement and congratulations as appropriate. Both parents and teachers will appreciate Progress chart and multiple profiles that will help them to keep track of kids' success.

Knowledge of shapes forms the basis of all learning and is essential for preparing children for reading, writing and math. Tracing activities develop fine motor skills and improve hand/eye coordination. Learning shapes develops ability to make logical connections which is a precursor to both math and language arts. Shapes And Robot Tracing is a perfect app to get kids ready for preschool and is a nice addition to parents' or teachers' educational app collection.

"Knowledge of shapes forms the basis and is essential for preparing children for reading, writing and math, as kids often learn to recognize words and numbers by their shape", said Kid's Academy CTO Alexander Shingel "With Shapes And Robot Tracing we wanted to give kids an opportunity to learn shapes and have fun playing fascinating games."
