Park Ridge, Illinois - Nravo Inc. today is pleased to announce the release and immediate availability of Lightomania 1.0.1, an update to their popular animated puzzle game for iPad, iPhone, and iPod touch devices. Featuring a duo of charming fuzzy characters called "lightomaniacs," users must solve logic puzzles that enable the lightomaniacs to steal the light bulb. In the most recent version of Lightomania, minor bugs are fixed and the app will be available globally.

In order to steal the light bulb, users pull the tongue of the lightomaniac character, choose the best trajectory, and release to make the jump. To jump twice as high, users can have the characters bounce off of one another. If the user obtains three lightnings in a set amount of jumps, they can collect their wings and unlock the next pack of challenging puzzles. The less moves it takes to reach the target results in more bonuses for the user.
