

Typinator is part of TheMacBundles Volume 2

Published on 07/06/09

Ergonis Software today announced that Typinator 3.5 is available as part of the TheMacBundles, a bundle of 11 great Mac products. Typinator is a powerful, yet elegantly simple text expansion utility that works across all applications. It detects specific sequences of typed characters and automatically replaces them with text snippets. Typinator is joined by the 10 other high-quality Mac software products to form the bundle.

Hagenberg, Austria - Ergonis Software today announced that Typinator 3.5, the fastest and brand new version of its highly acclaimed text expander, is available as part of the TheMacBundles, a bundle of 11 great Mac products. Typinator is a powerful, yet elegantly simple text expansion utility that works across all applications. It detects specific sequences of typed characters and automatically replaces them with text snippets, graphics, URLs, dates and special characters. The brand new version 3.5 of Typinator introduces a new technology that makes the expansion and insertion of text even faster than before.

Typinator is joined by the following other quality Mac software products to form the bundle:

Caboodle - A lean, clean, snippet machine, Dejal Caboodle is perfect for storing and organizing those bits of information that you might have previously stored elsewhere. Includes customizable fields, encryption, and support for embedded images, PDFs and more.

IPNetMonitorX - Featuring 23 integrated tools, IPNetMonitorX is designed to help you quickly troubleshoot Internet service issues, gather data to solve the problem either directly or through your Internet Service Provider, and optimize your Internet connection.

MailTags - transforms Apple's Mail application into a powerful email management system and puts an end to email chaos. It allows you to tag your email messages with keywords, projects, notes, and more.

PrintMagic - A tool that expands the printing capabilities of OS X. Instantly and easily selectively print just the info you want in any program via your own shortcuts or a versatile interface. Add notes or time-date stamps to anything you print, create print projects, more...

ShutterBug - Whether it's a personal site to share your photos, movies, and stories or a professional presence to communicate your message or create an online store, ShutterBug can help you do it, easily, quickly, and custom built to your specific needs.

Trampoline - Do you have a core set of apps, documents, or web apps that you use all the time? Do you almost never close them? Do you move back and forth between them all day long? If you want to get to your apps FAST, you NEED Trampoline!

Voila - Voila is your complete capturing solution, allowing you to capture, annotate, organize, and share screen captures from virtually ANY source! Capture full screen games, multiple windows, webpages, webcam inputs, and much more.

World Clock Deluxe - Regularly work with people across the world? Have family or friends living in other countries or time zones? Often travel abroad? World Clock Deluxe, from MaBaSoft, will make your life much easier.
