

Chromatic Bytes Releases Zeusdraw 1.2

Published on 07/13/07

Chromatic Bytes, LLC announces the immediate availability of ZeusDraw 1.2, an update to its Mac OS X vector drawing program. ZeusDraw 1.2 adds the ability to convert PDF and Postscript files into editable ZeusDraw objects. It also has improved Print dialogs and adds German language localization. This is a free update for currently registered users.

New York, New York (July 12, 2007) Chromatic Bytes, LLC announces the immediate availability of ZeusDraw 1.2, an update to its Mac OS X vector drawing program.

This is a free update for currently registered users.

ZeusDraw 1.2 adds these new features:

Editable PDF and PostScript - ZeusDraw 1.2 can convert most imported PDF, PS and EPS files into ZeusDraw objects. These objects can then be edited and modified like objects created directly in ZeusDraw. (PDF conversion requires 10.4 or later.)

Improved Print dialog - ZeusDraw's printing features are now more easily accessible. The new dialog also adds the ability to print only the selection and to scale the entire design or a selection so that it just fits the paper size.

German language localization - German language sales and support are provided by DanHolt Consulting: <http://www.danholt4mac.eu/>

ZeusDraw is US\$ 90 for new users and requires OS X 10.3.9 (10.4 for some features). A 30 day free trial is available at <http://www.chromaticbytes.com>
