

CS Odessa helps Visio users switch to the Mac

Published on 07/15/07

CS Odessa announces the release of ConceptDraw 7.1, a new version of its popular vector drawing and diagramming software package. New version intended to strengthen ConceptDraw position as primary Visio replacement on Mac OS X platform.

Odessa, Ukraine, July 15, 2007 - CS Odessa announces the release of ConceptDraw 7.1, a new version of its popular vector drawing and diagramming software package. New version intended to strengthen ConceptDraw position as primary Visio replacement on Mac OS X platform.

ConceptDraw 7 is an application that makes preparing of professional business graphics effortless for people who do not have advanced drawing skills. Organization charts, flowcharts, business graphics as well as network and database diagrams are just a few of the many tasks ConceptDraw 7 can easily handle.

Most advanced Visio features such as intelligent objects, built in basic scripting language and shapes custom properties could be found in ConceptDraw 7.1. This release has added Table View the equivalent of Visio powerful ShapeSheet function which is used to construct intelligent shapes or provide them with custom behavior. Visio XML support also included to provide handy files exchange with Visio users.

"ConceptDraw 7.1 has cross-platform compatibility and according to our new EULA can be used on one Macintosh and one Windows computer or on single computer with cross-platform environment. That helps organizations and individuals, who wants to migrate to Macintosh environment, and make it safely and with minimum costs," – said Oleg Bocharnikov, Head of Product Management Department for CS Odessa.
