

Remotix VNC & RDP for Mac updated with new features and design changes

Published on 12/18/13

Nulana LTD today is proud to announce the release and immediate availability of Remotix VNC & RDP 2.1, the update of their speedy and stable remote desktop application for Mac OS X. Remotix with support for both VNC & RDP provides remote access to Mac OS X, Windows, Linux and doesn't require any additional software installed. The updated version includes a new design, and some new features like Multi-Touch gestures that go to the remote machine, server categories, and master password.

Perm, Russian Federation - Nulana has announced the release of Remotix 2.1, the update of their fast, reliable and resource efficient remote desktop application for Mac OS X. A heavy emphasis was placed on the user experience and data protection. New version has a completely new design, offering even more convenient way to control multiple computers running Mac OS X, Windows and Linux from anywhere.

Version 2.1 brings Multi-Touch gestures to the remote desktop (Apple Screen Sharing only). Zoom, smart zoom, scroll and rotation - they all work together to make remote access a breeze. Server categories allow users a convenient way to save and organize all of their connections. Master password protects the app from unattended access.

New features:

- * New design!
- * Multi-Touch gestures go to the remote machine (Apple Screen Sharing only)
- * Server categories
- * Master password to protect the app from unattended access

Bug fixes:

- * OS X Mavericks Screen Sharing encrypted connection fixes
- * RDP crash fixes
- * RDP timezone redirection fixes
- * OS X Mavericks font issue fixed
- * Caps Lock works on the remote machine
- * Non-selectable .ssh files fixed

Pricing and Availability:

Remotix 2.1 for Mac is \$39.99 (USD) and available for purchase on the Mac App Store and Nulana's website. The update will be free for current users.
