

UppyPix ... Share Life As It Happens

Published on 12/27/13

Dash Technologies, LLC today announces UppyPix 1.9, their popular social networking app for iOS and Android. Easily publish and share photos during any live event or experience and stream your images in real time to an online gallery. With the UppyPix app, you can snap and view photos of sporting events, parties, hangouts, Craigslist, Ebay, feeding your cat, or just about anything you can imagine; as it's happening. Pictures are automatically published to your photo feed and available instantly.

Atlanta, Georgia - Dash Technologies, LLC, a professional services firm focused on delivering high-caliber technology consulting and managed services, today is proud to announce the release and immediate availability of UppyPix 1.9, their popular social networking app for iOS and Android.

UppyPix was created to easily let you publish and share photos during any live event or experience and "stream" your images in real time to an online gallery. With the UppyPix app, you can snap and view photos of sporting events, parties, hangouts, Craigslist, Ebay, feeding your cat, or just about anything you can imagine - as it's happening. Your pictures are automatically published to your photo feed and available instantly on UppyPix or to share anywhere.

Your images are your own. Show them off in a single photo feed published automatically as you snap photos and capture the whole experience; the app allows you to focus on capturing the best images as the world watches.

Your images on social networks can span multiple posts and get lost in a cluttered feed of updates. With UppyPix, get the viewers you want and send them to your photo feed so that they can enjoy effortlessly. For an epic experience, invite others to post photos to a single feed and watch as the live action unfolds through the eyes of the crowd.

For UppyPix users, just snap a photo and post! You now have an instant photo feed to share with the world. How do other people view your feed? They can visit UppyPix online and enter the username of the person they want to view. You can also post a link on Facebook and Twitter so people can go to your photo feed instantly and watch your photos live! Viewers do not have to register to view the photos.

The possibilities are endless with UppyPix! So why not start now? Create unlimited photo feeds for a birthday, wedding, school activities, or just sitting around the house (with the cats).

UppyPix is the only safest and most secure photo feed website around. We do not collect your name. We do not sell your photos. Your username is not associated with anyone! All photos are deleted off our servers every 5 days! You can always save your photos from our website to your computer or mobile apps within the 5 day period.

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Requires iOS 7.0 or later
- * 1.9 MB
