SimpleMovieX, the versatile Video Editor

Published on 07/16/07

Aero Quartet has released version 3.1 of SimpleMovieX, the Mac OS X movie editor. With a feature set roughly similar to QuickTime Pro, SimpleMovieX extends editing capabilities to other popular video formats AVI, Google Video, MPEG-1, MPEG-2 and MPEG-4. The main advantage of native editing is speed and quality, since no re-encoding is required to save edited movies.

Aero Quartet has released version 3 of SimpleMovieX, the Mac OS X movie editor. With a feature set roughly similar to QuickTime Pro, SimpleMovieX extends editing capabilities to other popular video formats AVI, Google Video, MPEG-1, MPEG-2 and MPEG-4. The main advantage of native editing is speed and quality, since no re-encoding is required to save edited movies.

This new version also supports Chapters, a simple way to structure long movies and split them into clips, a Batch Converter, and Audio Waveform tool to make sharp audio editing and synchronization. SimpleMovieX also provides a search pane to quickly find a sequence and an adaptable timeline for accurate playhead positioning even in large duration movies. Huge files beyond 4GB, for example 6 hours of TV recording, can be edited without truncating.

SimpleMovieX is a tool for a wide public: Discriminating TV viewers that clean their recordings of commercials, Users of a digital camera, mobile phone or camcorder that need to edit, compile, convert and share their personal footage, Video collectors compiling music concerts or Google Video shorts, ...

For occasional users, an unlimited demo version of SimpleMovieX is available for free download.

SimpleMovieX requires Mac OS X v10.3 or higher. QuickTime MPEG-2 Playback Component is required to take advantage of MPEG-2 capabilities. QuickTime Pro is not required.

Aero Quartet was founded in 2005 in Barcelona, Spain by Benoît Joossen. Our charter is to create useful software for the Macinstosh platform. "The major software companies have already filled the space with their big software suites. But you don't fill a box only with big stones, you also need lots of pebbles. As a small developer, I want to craft some of those pebbles, indeed I want them to be gem stones !"
