

BlueSprig Announces Password Only as the First Digital Property Expert

Published on 01/12/14

BlueSprig, the fresh alternative to software, at home or on the go - your one-stop shop for security, privacy, performance and efficiency today is happy to announce its official release of Password Only for iOS along with another newly release app iQNote. Password Only allows you to take control of your digital life - even when you die. You can keep track of your email accounts, online banking, PayPal, eBay, Amazon, web hosting and decide what happens to them in just a few clicks.

San Francisco, California - BlueSprig, the fresh alternative to software, at home or on the go - your one-stop shop for security, privacy, performance and efficiency today is happy to announce its official release of Password Only for IOS along with another newly release app iQNote.

Nowadays, there are so many important accounts, passwords and other digital properties. If lost then they are lost forever. So don't take any risks with your passwords, account info, card numbers, or IDs. Keep them protected, secured, and easy to access in Password Only. Then, if anything unexpected happens, your bank accounts, financial info, health info, credit cards, insurance, and everything else protected by passwords will be transferred to the email address you trusted.

Pam Jean's young daughter was killed in a skiing accident. She lost many memories about her lovely girl. Until one day, she got her daughter's Facebook account and password. She logged in and found many photos and other precious information about her daughter. (Pam Jean did not have a Facebook account before.)

Inspired by this story, BlueSprig came up with an idea to develop Password Only, which you can download from App Store now.

"We hope to develop an App which can transfer digital property automatically if anything unexpected happens." says BlueSprig co-founder Jason Johnson, "Password Only allows you to take control of your digital life - even when you die. You can keep track of your email accounts, online banking, PayPal, eBay, Amazon, web hosting and decide what happens to them in just a few clicks. You may want these digital legacies to be passed to your beloved ones."

Device Requirements:

- * Requires iOS 6.0 or later
- * iPhone, iPad, and iPod touch
- * This app is optimized for iPhone 5
- * 5.2 MB

About Password Only

Password Only stores confidential personal information related to credit cards, bank cards, email accounts and more by using Advanced Encryption Standard (AES), the most powerful technology for securing private data.
