

nQuicky PCI Offers High Speed Wireless Networking to Power Macs

Published on 07/17/07

QuickerTek introduces an exciting wireless upgrade for users of PCI Power Macs who want 802.11n wireless speed. PCI nQuicky triples wireless range and speed of the previous 802.11g wireless specification. nQuicky PCI eliminates the need to buy a new Mac just to get 802.11n wireless. nQuicky PCI delivers 802.11n wireless for \$149.95 USD.

The nQuicky PCI offers the latest wireless benefits, yet retains backward compatibility with previous 802.11 wireless standards - all IEEE 802.11 b/g/n networks and performs to it's full speed 300 Mbps potential across the 2.4GHz frequency with 802.11n rated network hardware. This compatibility includes all Apple AirPort models - but users get the highest possible speeds when connecting to an AirPort N Base Station.

nQuicky PCI Compatibility

Any Power Mac with a free PCI slot, including:

Power Mac G3;

Power Mac G4;

Power Mac G5

Mac OS X version 10.4 or higher;

All 802.11 b/g/n Apple Base Stations and access points;

Routers by LinkSys and d-Link, Belkin, Netgear, and all other Mac/PC Wireless LAN.

Extended, Mixed and Legacy modes supported;

Part #: nQuicky-PCI

FCC, CE rated

Like most QuickerTek products, the nQuicky PCI is backed with a one-year warranty on parts and labor. Additional product information is found at http://www.quickertek.com/products/nquicky_pci.php .
