

PDF Scanner Debuts Scanning Book Spreads Into Individual Pages on iOS

Published on 01/30/14

DAR Software today introduces PDF Scanner 1.0, the first iOS scanner app with the ability to correctly process individual pages of double-page book spreads. Featuring automatic detection of scanned documents, manual crop area adjustment as well as distortion correction, PDF Scanner is a full-cycle scanner app that enables anyone to make digital copies of paper bills, receipts, documents and books, save them to PDF & share in a variety of ways; including email, Dropbox cloud sharing or printing.

Odessa, Ukraine - DAR Software, the makers of PDF Printer, is thrilled to announce the release of PDF Scanner 1.0, the first iOS scanner app with the ability to correctly process individual pages of double-page book spreads. PDF Scanner is built on the innovative algorithms, which ensure the exclusive quality of scanned images and corrects majority of distortions.

PDF Scanner is a full-cycle scanner app, which enables its users to make digital copies of paper bills, receipts, documents and books, save them to PDF and share in a variety of ways. The app offers automatic detection of scanned documents, manual crop area adjustment and corrects majority of distortions.

PDF Scanner saves resulting images into Portable Document Format: it lets merge multiple images into a single PDF or generate multipage PDFs. Owing to the robust PDF tools, the user has the ability to reorder or delete pages within multipage documents.

It is noteworthy that PDF Scanner is the first app in its niche designed to properly process double-page spreads - the app processes and saves each page of the spread independently. Therefore, PDF Scanner empowers researchers, educators and business users to take advantage of their iPhones and iPads, when there is no access to indoor scanners.

In addition, PDF Scanner offers versatile document management and sharing options including email, Dropbox cloud sharing or printing.

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Requires iOS 6.0 or later
- * Universal Application
- * 14.8 MB

Pricing and Availability:

PDF Scanner 1.0 is \$2.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the Productivity category.
