

Selfie Dance makes you the star of two amazing, unique dance routines

Published on 01/31/14

Selfie Dance is the first dance app that features realistic, amazing dance routines. You select a head shot by choosing a photo from your camera roll, taking a photo, or even downloading a celebrities photo from the internet. This head shot is then attached to your choice of dancer - a hot, lean female dancer or a ripped, masculine male dancer. Finally, choose the dance routine - a hip hop routine or animation routine and watch your dancer rip it up on a city sidewalk to original music!

San Diego, California - Selfie Dance is the first dance app that features realistic and amazing dance routines. You select a head shot by choosing a photo from your camera roll, taking a new photo(a selfie or a photo of a friend), or even downloading a celebrities' photo from the internet.

The built-in photo interface allows you to zoom, rotate and crop the selected photo to just the chosen area. This head shot is then attached to the dancer of your choice - a hot, lean female dancer or a ripped, masculine male dancer. Finally, choose the dance routine - an energetic and frenetic hip hop routine or a hypnotizing, jaw-dropping animation routine - and watch your creation rip it up on a city sidewalk to original music created just for Selfie Dance! When the dance is complete, you can change your photo, your dancer and your dance and try again. Then, share the dance through Facebook, Twitter or an email.

Surprise your friends and family by creating a dancer using their image!

Selfie Dance updates - coming soon - will offer additional dance routines, dancers, the ability to choose different clothing and special surprises!
