

Stellar Launches V3 of its powerful cloning utility Stellar Drive Clone

Published on 02/05/14

Stellar Data Recovery today announces Stellar Drive Clone 3.0, an update to their popular drive cloning utility for Mac OS X. Stellar Drive Clone makes an exact block by block replica of Mac drives and volumes including system settings and partition information. Now compatible with OSX Mavericks, version 3.0 sports a complete overhaul of its interface, as well as introduces an advanced and reliable backup feature through which automatic backup can be easily scheduled.

Metuchen, New Jersey - Stellar Data Recovery(R), globally acclaimed software publishers, today announced the launch of version 3 of their acclaimed drive cloning software 'Stellar Drive Clone'. This proficient tool makes an exact block by block replica of Mac drives and volumes including system settings and partition information. An advanced and reliable backup feature has been added to the new version through which automatic backup can be scheduled easily. The entire interface has received a complete revamp as well so that all features such as cloning, restoration, backup & imaging are easily accessible. Drive Clone is now also compatible with OSX Mavericks.

"Users often upgrade their hard drives to ones with a larger storage capacity. To help facilitate data migration, Stellar Drive Clone acts as an efficient enabler to smoothly manage this transition. Users can create clones of their existing drives and restore it on a brand new drive. The new drive can be used immediately without installing applications again. We have added a powerful backup feature and enriched the usability aspect immensely" said Mr. Sunil Chandna, CEO - Stellar Data Recovery.

Other useful features include creating an image of volumes and also creating a bootable disk which you can use to boot your system from in case of failure. With the backup feature you can back-up all folders and important files anytime. You can even choose to schedule regular backup and ensure it is maintained timely. The restore function allows you to easily restore drives to their original state in case of failure by restoring the image created earlier.

Pricing and Availability:

Stellar Drive Clone 3.0 is available as a try-before-buy software. The free version allows users to analyze the cloning options exhaustively. Through the full version, which is priced competitively at \$39 (USD) users can create clones of the drives and volumes. There is also a free Version is available for download.
