

Slice Fractions released - A Puzzle Game That Helps Kids Learn Fractions

Published on 02/07/14

Montreal based Ululab Inc. today introduces Slice Fractions 1.00, its new educational title developed for iOS and Android devices. Designed for kids who are new to fractions, Slice Fractions features challenging puzzles, colorful artwork and memorable characters that will introduce fractions to the player in a motivating and intriguing world. It is the fruit of multiple years of research and development by Ululab with the help of math learning experts from the University of Quebec in Montreal.

Montreal, Canada - 1, 1/2, 1/3, Slice! Ululab Inc. today is pleased to announce the release and immediate availability of Slice Fractions 1.00, its new educational title developed for iOS and Android devices. Designed for kids who are new to fractions, Slice Fractions is the fruit of multiple years of research and development by Ululab with the help of math learning experts from the University of Quebec in Montreal (UQAM). Slice Fractions is the current Apple Editor's Choice in the US App Store and many more around the world!

Make your child hungry for his or her next math discovery! Slice Fractions features challenging puzzles, colorful artwork and memorable characters that will introduce fractions to the player in a motivating and intriguing world. The app is kid-friendly with no ads or in-app purchases.

Features of Slice Fractions include:

- * Slicing through ice and lava to clear the mammoth's path
- * Learning fraction concepts without words
- * An activity reviewed by researchers at a Canadian university (UQAM)
- * Collecting funky hats
- * Solving over 60 innovative physics puzzles

"We have worked very hard to create a polished and intuitive experience that will allow children to understand fractions, the bottleneck of early math education, by themselves," says Francois Boucher-Genesse, Chief Game Designer on Slice Fractions.

Slice Fractions is based on the following Common Core concepts: (2.G.A.2) (2.G.A.3) (3.NF.A.1) (3.NF.A.3) (4.NF.A.1) (4.NF.A.2) (4.NF.B.3).
