

Duckie Deck Collection - Unique Combination of 6 Engaging Games For Kids

Published on 02/07/14

Duckie Deck is proud to announce Duckie Deck Collection 1.2.2, a unique combination of 6 engaging games that help kids form healthy habits and positive attitudes by invoking smiles. More than 8 million children in 180 countries around the world are playing Duckie Deck's games. Every day, Duckie Deck supports parents around the world in the task of educating their young children. Our games teach in a simple way why you should share with others, segregate garbage or brush your teeth.

Krakow, Poland - Duckie Deck was founded in Krakow two years ago with a vision of educating through play and inducing smiles on the faces of toddlers. Since then, the project has continually received praise from parents of preschoolers from every corner of the globe. The Duckie Deck Collection games support parents in the everyday education of their children using simple approaches, understandable even for kids as young as two. Parents of toddlers often do not know how to effectively encourage a three year old to share toys with other children or how to entice them to eat vegetables and fruits. Give Duckie Deck a try - we're sure it'll help.

Duckie Deck Collection is designed for preschool-aged children. Its creators are focused on developing a platform which develops creativity in an intuitive way and teaches children positive attitudes and healthy habits - all the essential skills for a preschooler.

Our biggest mission is to raise a smiling human. We believe that positive emotions assist in the acquisition of the good habits and values that we're focused on. Our fun games teach in a simple way why you should share with others, segregate garbage or brush your teeth. We demonstrate the meaning of love, friendship and respect. We believe that the children who play our games will change our world in a few years, making it a friendlier place. - says Marek Przystas, CEO of Duckie Deck Development.

Each of our games is developed in cooperation with teachers, parents and children, who valiantly test and improve our products. Ideas for new games flow in from all over the world, and parents inspire us to create more and more of them. We are delighted with the growing interest in our products and very warm words from preschool teachers from all over the world. Duckie Deck has become an effective tool during their activities with children - says Marek Przystas.

Friendly colors, playful soundtracks and an uncomplicated user interface keeps the children focused and eager to explore new things in the game and, more importantly, they can play and learn without distraction since all applications are completely safe and free of advertising.

Duckie Deck Collection is a mobile application available on Android systems, iOS and now, thanks to the cooperation of Duckie Deck with Whalla Labs, also on Windows Phones 8 and tablets or laptops with Windows 8.
