

InFocus Pro 3.0.0 - Major Update to Five-Apps-in-One Organizer

Published on 02/10/14

Elixir Software Group, Inc. today announces InFocus Pro 3.0.0, an update to their popular productivity app for iOS devices. Completely integrated, InFocus Pro serves as an all-in-one organizer that contains a Calendar, Checklist, To-Do list, Projects, and Notes modules. In addition to several modifications for iOS 7, the update includes the ability to add a background image to the Calendar and set a custom blur. Users can also hide and/or add calendars, add more tabs, and sort the tab order.

Pleasant Hill, California - Elixir Software Group, Inc. today is pleased to announce the release and immediate availability of InFocus Pro 3.0.0, an update to their popular productivity app for iPhone, iPad, and iPod touch devices. InFocus Pro serves as an all-in-one organizer that contains a Calendar, Checklist, To Do list, Projects, and Notes modules. Completely integrated, a user can create a project in the Checklist module and InFocus Pro will add it in the Projects module.

The Checklist is a to-do style checklist with a simplified entry. Users finger drag down to create a new blank entry. Reminder alerts and the percentage of the checklist task completed can be set. Checklist items can be shared via email and a Search feature allows users to quickly access their lists.

InFocus Pro has a structured To-Do module that features tabs for better organization. The update allows the user to add more tabs and to sort the tab order. InFocus Pro also includes the ability to set a start/end date for tasks, track the percentage completed, set two different alerts, prioritize and star tasks. The interface also tracks which to-dos are overdue and displays the tasks according to due date. Tasks are organized by priority and can be shared via email. There is also a text-to-voice feature. When activated, a voice will narrate the date and announce which tasks are due on that day.

InFocus Pro has a Notes module that stores notes as text, a sketch, or a photo image that can be taken or imported from the user's photo library. There is also the option to add a handwritten Sticky note. The Handwriting feature provides further customization of text color, a preview function, and the ability to autoscroll while writing. In addition to notes, users can handwrite their events, appointments, tasks or other entries.

The final Project module helps users organize and manage projects. Within each project, subfolders, notes, and to-do tasks can be added. Users can also set the project's priority and color code their project folders. The Search feature and ability to forward to email is also available.

Feature Highlights:

- * Comfortable and simple User Interface
- * Completely integrated between modules
- * Handwrite events and/or to-do tasks for quick entry in the color desired
- * 4 different calendar views
- * Ability to organize To-do tasks with tabbed categories or a simple Checklist style to-do list
- * Add Project folders & subfolders with to-do tasks and/or notes
- * Add Notes with handwritten sticky, text, pictures and sketches
- * Organize projects visually with multiple subfolders, tasks and notes all under one view
- * Text-to-Voice function to inform of upcoming events, activities, and assignments
- * Ability to password-protect
- * Share tasks, projects, and other information via email
- * Search feature

Version 3.0.0 is a major update with many modifications for iOS 7. One of the biggest changes incorporated is the ability to customize the calendar. Users can select either Classic Calendar or the new Photo Calendar. With Photo Calendar, users can add a background photo from their photo library or select from 21 different wallpapers and customize the blur. The photo background is the size of the whole screen and can be pinched to modify. The Calendar module also syncs with iCal and has four different views: List, Day, Week, and Month. Calendars also can be added and/or hidden in InFocus Pro.

"InFocus Pro is an all-in-one organizational tool that covers a lot of ground, all from the same interface," says Hammad of Freeware Genius (1 March 2013). "It integrates with the iPhone calendar, has a very nice interface, and offers support for hand-drawn input for tasks and notes (very useful when you're in a hurry). If you've been looking for an iPhone app to keep you organized then by all means give this one a try."

"Our goal was to offer the most powerful and intuitive organizer available," says Steven Abrams, president of Elixir Software Group, Inc. "Although InFocus Pro is one app, it is really five productivity apps packaged in one. The ability to add data with multiple sources of input is not only convenient, but also more efficient. For example, the app's engine was designed to integrate each module's to-do's and notes. We all have different ways of organizing ourselves and therefore, we have different modules that fit different needs. In addition to integrating to-do's and notes all under one view in the Projects module, it was our goal to make it visually easy to picture the structure of your projects, thereby making it simpler to be organized. We designed InFocus Pro to be intuitive, easy to use and powerful. Its advanced features and flexibility means it can handle the simplest or most complex tasks. This app does it all!"

Device Requirements:

- * iPad, iPhone, and iPod touch
- * iOS 6.0 or later
- * 20.3 MB

Pricing and Availability:

For a limited time, InFocus Pro 3.0.0 is free and available worldwide exclusively through the App Store in the Productivity category.
