Hyderabad, India - mTouchLabs, a pioneer in the mobile development arena, today is proud to announce the release of Fix and Set Wallpaper 1.0, their new lifestyle app developed for iPhone, iPad and iPod touch. Fix and Set Wallpaper will help you to make a perfect iOS 7 wallpaper screen for your iDevice. This app makes it easy for you to set any of your wallpapers look as the way you want them to display.

Ever since Apple launched iOS 7, everyone had trouble using own pictures as wallpapers. iOS7 only seems to want to position a background image one way, and no matter how hard you try, no matter how much you pinch or zoom, iOS7 just snaps you wallpaper back in and, in some cases, makes it look ridiculous. mTouchLabs identified the issue and created Fix and Set wallpaper app exclusively for iPhone and iPad.

Fix and Set wallpaper adds a border around every image so that, when you assign it to a wallpaper background and it zooms in, the image will remain intact. Fix and Set Wallpaper is very easy to use:

- * Load image
- * Pinch, Rotate, crop and position the way you want to look
- * Preview you wallpaper against your home screen
- * If you are satisfied, you can save it to photo library
- * Finally set as your wallpaper
- * If you want to make any wallpaper for your friend, family member or your girl friend , then you can directly send final wallpaper via mail

Main Features:

- * Scale (zoom in and out as much as you want)
- * Rotate image in any angle
- * Drag to move to adjust position
- * Rotate photo 90 clockwise, 90 counterclockwise
- * Home screen wallpaper preview in a single button tap
- * Save to photo library and set as your home screen and lock screen wallpaper
- * Email or share on facebook

Fix and Set Wallpaper listed in Top 50 charts of Lifestyle category in US, UK and Australia.

Device Requirements:

- * iPhone, iPad and iPod touch
- * Requires iOS 7.0 or later
- * This app is optimized for iPhone 5
- * 12.0 MB
