

## Haypi Monster: The Lost Tower 1.3 for iOS - The Magic Grows

Published on 02/10/14

Haypi Co., Ltd. today announces Haypi Monster: The Lost Tower 1.3, a significant update to their popular MMORPG for iOS. Haypi Monster: The Lost Tower is a cartoon style EDU game. Almost 200 different monsters are here, waiting for you to collect. Feed, breed and train them with your heart and love, form your dream team to challenge the mysterious lost tower. Version 1.3 has loads of new content added to it. Challenges, activities, buildings, scenes and new collectable monsters have been added.

Shanghai, China - The mobile software developer, Haypi Co., Ltd. today is pleased to announce the release and immediate availability of Haypi Monster: The Lost Tower 1.3, a new significant update to their hit MMORPG for iPhone, iPad and iPod touch devices. The new game version 1.3 has loads of new content added to it. Challenges, activities, buildings, scenes and new collectable monsters have been added.

Up the mystic paths of the Lost Tower, new monsters have come up. Now the different floors have become home of new critters such as Needles, Bragga, Robo, C-4PO, and Pinstar. Needles looks like a needle-ball and belongs to the Physical element. He does actually roll itself into a ball, in order to hide his needles and prevent hurting others unintentionally. This little critter has been timid and shy since its birth. He looks like a puffy little brownie. Bragga is an exotic royal family member, and also belongs to the Physical element. He keeps boasting about his noble origin and about his resourcefulness. He looks like a complacent ninja monkey, and his confidence has solid grounds.

Both Robo and C-4PO have arrived from planets where only robots dwell. But they belong to different elements. Robo belongs to the Psychic element and is more sensitive and spiritual. He has a natural animosity against speedy things. His favorite colors are white blue and red, and he has them painted all over his metal body. C-4PO belongs to the Electric element. Looks like his not over with the time-travel lag, ever since he arrived from his planet of robots. He seems to be always in a state of instability. He looks old-fashioned but it also seems that he's smiling through the metal. Pinstar is the only monster of the Water element that is joining the crew of critters in the Lost Tower. He looks like a proud blue lobster, who is so keen on cutting things into half with his strong pincers.

A whole new scene has been added to the game. Mystical creatures live there and turn the adventure into a real challenge for the bravery and skills of the monster trainers. The new scene - the Thorny Forest - is situated between the fire Volcano and the Frozen Cavern. What kind of climate can be expected there?

An Alchemy building has been added to the main screen of Haypi Mosnter: The Lost Tower. In that magical place, players can exchange Legend Fragments for legendary scrolls. Legendary monsters are not just legends, they exist!

Now the game also offers a new activity available for the monster trainers. It's called "Trial of the Grand" and features challenging powerful monsters to win legend fragments. The activity is only available for players at floor 4 or above, every Tuesday and Thursday server time.

Legend fragments can also be won in the "Titan's Bronze Hoard" challenge. It has been added in Team Mode and is available every Saturday server time for players at floor 3 or above. One legend fragment will be awarded each time the challenge has been passed!

Taming  
a legendary monster looks so real now!
