

Acronis Offers Mobile Content Management Promotion with MobileIron

Published on 02/10/14

With Growth in Smartphone Use, Promotion Demonstrates Commitment to Simplifying and Securing Mobile Content Management. Acronis, a global data protection company, today announced a promotion for Acronis mobilEcho with MobileIron AppConnect to help enterprise IT boost mobile productivity and securely manage mobile devices. With AppConnect-enabled apps, customers can secure, manage, and distribute third-party apps to their employees.

Arlington, Virginia - Acronis, a global data protection company, today announced a promotion for Acronis mobilEcho with MobileIron AppConnect to help enterprise IT boost mobile productivity and securely manage mobile devices.

"Mobile devices have made employees more productive, and IT is fighting to maintain compliance without hindering that productivity," said Ezequiel Steiner, General Manager, Mobility Solutions at Acronis. "Now that many IT departments have implemented MDM systems to gain control of mobile device security, the natural next step is to extend that control to also manage and secure the access, storage and editing of content on those devices. This promotion makes it easier and faster for IT to get back in the driver's seat, while ensuring that users gain the simplicity and ease of use they crave. We are excited to work with MobileIron to meet the evolving needs of organizations with the most stringent security regulations."

As an AppConnect partner, Acronis is leveraging the MobileIron platform to deliver a best-of-breed solution for secure mobile content management and editing with Acronis mobilEcho(R). With AppConnect-enabled apps, customers can secure, manage, and distribute third-party apps to their employees. MobileIron's AppConnect ecosystem includes more than 50 productivity apps and over 100 more are in development. Acronis is pleased to announce that customers who are implementing Mobile First strategies can take advantage of mobilEcho with MobileIron AppConnect at a promotional price for a limited time.

"Our ecosystem features some of the most popular mobile business apps available," said Sean Convery, Vice President of Product Management for MobileIron. "Acronis' strong focus on both the data protection that IT requires and the great experience users demand made them an ideal partner."

Acronis mobilEcho became one of the first partners of the AppConnect ecosystem in 2011. At the time it was recognized as the first mobile content management (MCM) application on the market, and today it is a leading solution for MCM and editing needs that's fully integrated with all AppConnect features on both iOS and Android.

Device Requirements:

mobilEcho Client Application Supported devices:

- * iPad, iPad 2, iPad 3, iPad 4, iPad mini
- * iPhone 3GS, 4, 4S, 5, 5C and 5S (iOS 5 or later)
- * Android Phones and Tablets

mobilEcho Client Application Supported OS's:

- * iOS 4.2 or later
- * Android 2.2 or later

Acronis mobilEcho:

Acronis mobilEcho is the industry's first secure Mobile Content Management (MCM) solution that meets the stringent security and management policies required by today's enterprise to turn a mobile device into a true business platform. For example, it meets the needs for
