

Circuit-Breaker released for iOS and Android: Stylish and Addictive Game

Published on 02/13/14

Finnish developer, Adapkit today introduces Circuit-Breaker 1.0.0, its new game title developed for iOS and Android devices. Circuit-Breaker is a quick reaction game with a Steam Punk style. Players try to cut the wire by following a sequence of lights, but one wrong move spells disaster. Scores can be shared, and friends challenged to see who has the fastest fingers. Circuit-Breaker is very addictive and simple to play, and sure to appeal to the competitor in everyone.

Tampere, Finland - Adapkit, developer of Monsta Points, the top rated family reward chart app, announced today that they have released an new game "Circuit-Breaker" on iOS and Android platforms. Circuit-Breaker is a really simple, but totally addictive little game that is sure to appeal to the competitor in everyone.

The gameplay builds around the idea of a burning fuse, which the player must cut by following a coded sequence of lights. Tension builds and as each fuse is cut - another appears - burning faster and faster. There are no winners, only losers who hang on for longer. The game features a Victorian steam punk style that is very distinctive. The design is based on old engineering diagrams and has been given a rough colored print look.

"Circuit-Breaker is a great little timewaster, perfect for a few moments escape in the day. It was quick to make - and it's fun to play" says game designer Steve Ellis.

Players can share their score and challenge friends from inside the game - as well as seeing how they rate against the "fastest fingers in the world".
