

Record iPad Keynote video screencasts with Presentation Recorder

Published on 03/03/14

Seattle based Qrayon today introduces Presentation Recorder 1.0. their new business app for iPad. Presentation Recorder offers the easiest and fastest way to record videos of Keynote and PowerPoint presentations right on your iPad, and securely share them with your clients and colleagues. Simply open a PDF file, such as decks exported from Keynote or PowerPoint, tap Record, and start speaking. Everything you say and point to is recorded in sync with the displayed slides.

Seattle, Washington - Qrayon today is proud to announce the release and immediate availability of Presentation Recorder for the iPad. Presentation Recorder is the easiest and fastest way to record videos of Keynote and PowerPoint presentations right on your iPad, and securely share them with your clients and colleagues.

Recording a presentation couldn't be easier:

1. Open a PDF file, such as decks exported from Keynote or PowerPoint
2. Tap Record, and
3. Start speaking.

Everything you say and point to is recorded in sync with the displayed slides. When you are done, the video is instantly saved to your camera roll. There is no lengthy conversion process. You can send videos directly via email, post them online to services such as YouTube or Vimeo, or upload via third party Apps like Dropbox.

Presentation Recorder is perfect for:

- * Sales presentations
- * Creative and Technical work
- * Training materials
- * And other professional communications

Use Presentation Recorder to create personalized video presentations and increase engagement with your customers. Set yourself apart from your competition, and communicate more clearly than with just text alone. Instead of emailing your clients static slide decks, you can now easily create custom video presentations tailored just for them.

Presentation Recorder is also a powerful tool for working more closely with your remote colleagues. Instead of describing something in a lengthy email, you can simply make a quick recording and point out exactly what you mean. Get on the same page faster, and with less room for error.

Unlike with online slide services, you retain 100% control over your slides and videos. Your content never leaves your iPad, unless you choose to share it or backup to iCloud. Securely email recorded videos directly to only your colleagues, or upload them to the service of your choice.

There are no monthly fees, or services to be tied to. Purchase once, and use Presentation Recorder forever.

Presentation Recorder produces clear, high-definition 720p Quicktime videos. These standard video files are cross-platform compatible, and you can edit them directly in other Apps such as iMovie.

Features:

- * Open exported PDF decks (or any PDF file) from Keynote, PowerPoint, or 3rd party Apps

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

(note that slide transitions are not preserved in PDF files)

- * Supports any page dimensions (e.g. standard 4:3 or widescreen slides)
- * Produces 720p HD standard cross-platform Quicktime videos
- * Virtual laser pointer
- * Record using the iPad's built-in mic, or an external one
- * Project organizer with customizable color categories
- * No monthly fees or service requirements

Device Requirements:

- * Compatible with iPad
- * Requires iOS 7.0 or later
- * 3.0 MB
