

iPhone app that helps with Depression

Published on 07/19/09

Texas based Deep Pocket Series LLC today introduces Sad Scale 1.2, their depression screening solution for iPhone and iPod Touch. Designed to take advantage of the iPhone's unique abilities and interface, Sad Scale is created to help screen for depression in the General Population, PostPartum Depression, 2 children depression scales, Geriatric depression scales. The application has 3 screening tests and it tracks your scores and graphs your results. The new features are tracking: energy & mood.

Lantana, Texas - Deep Pocket Series LLC today introduces Sad Scale 1.2, their depression screening solution for iPhone and iPod Touch. Designed to take advantage of the iPhone's unique abilities and interface, Sad Scale is created to help screen for depression in the General Population, PostPartum Depression, two children scales and Geriatric depression scale.

The application has 5 screening test and it tracks your scores and graphs your results. The user then can email their Primary care doctor, OB/Gyn doctor or health care provider. The test can be taken multiple times and the user can track for depression. It also takes you to different online resources for additional help.

Sad Scale is an iPhone application to help your health care provider follow your care. It is not a substitute for seeing a health care provider. This application contains to self screening test. The Zung depression test, Geriatric Depression scale and the Edinburgh Postnatal Depression Scale are in this application. The application is easy to use and will store your scores on your iPhone.

This application should be used with your health care provider. It does not replace the judgement of a professional health care provider. Please discuss using this app with your health care provider. Dr. Castro states his goal is to increase awareness of depression. He hopes this app will cause patients to seek professional help and make a difference in someone's life.

The new features are the ability to track mood, energy and plot this information. The user can then email this information to their health care provider. Also, the new edition allows to keep a notepad. This information can also be emailed. For current Sad Scale owners the update is free.
