Seoul, Korea - App development company, WAIZ today is proud to announce AwesomeDial 2.0.2, an update to its popular productivity app for iPhone. AwesomeDial is a convenient and easy-to-use contact information app that features integrated group management, speed dial, and smart search. Introducing a new beautiful design, version 2.0.2 updates the group management, loading speed performance, as well as minor bug fixes.

The application has interesting feature which send SMS and mail and make a call quickly and easily by simple touch. If touching the group icon twice or long, you can send the group SMS or group email easily and quickly. In addition to designate the function you want directly to each touch motion. AwesomeDial provides you with pretty speed dial function managed in an icon form. You can manage the group conveniently as it is automatically synchronized with the group in the contact information:

Synchronizing with the group in the contact information:

You can manage the group conveniently as it is automatically synchronized with the group in the contact information.

Convenient group editing function:

You can delete and create the group easily and add and delete the member from the group easily.

Pretty speed dial function managed in an icon form:

Register the people you usually contact with the photo and contact them easily and quickly. You can send the message and make a call by touching the photo.

Drag & Drop:

Change the place of group or speed dial by drag & drop. You may just as well drag after pressing long as doing by iPhone.

Quick search:

Search quickly by entering the part of name and part of numbers. Search the phone number fast by entering only some numbers you remember or the back part of phone numbers.

Definition of touch action:

Would you send the group email when touching the group icon long? Designate the function you want directly to each touch motion. From now on deliver the news easily, fast, and conveniently by the directly defined action.
