Metuchen, New Jersey - Stellar Data Recovery, a leading data recovery solutions provider, today is thrilled to announce the release of Stellar PST to MBOX Converter for Mac. This software helps you migrate your emails easily from Windows OS to Mac OS by efficiently converting MS Outlook files to Apple Mail. It performs an efficient conversion of all the emails, including attachments, without making any changes to the folder organization. It even converts password protected Outlook mails.

"Users that are looking at migrating from a Windows based system to a Mac machine would require a tool that can facilitate migration of their important emails. Microsoft will also soon end support for Windows XP, many users globally would look at upgrading. Some of them may move to Mac and therefore the need for such a tool would grow even more. Our attempt is to deliver useful & efficient products for our customers globally. Launch of 'Stellar PST to MBOX converter' is another such endeavor." said Mr.Sunil Chandna, CEO, Stellar Data Recovery.

The tool has an extremely simple and easy user interface which facilitates migration in three simple steps - Select, Convert & Save. You can select the PST files for conversion and then select the destination where you would like to save the converted files and click on convert. The software supports conversion of mailboxes from MS Outlook 2013, 2010, 2007, 2003. Stellar PST to MBOX converter is also compatible with the latest Mac OS X Mavericks.
