

## SMSLater for iPhone - Send SMS At A Later Date

Published on 04/10/14

Independent developer, Hakan Kutluca is proud today to announce the global release of SMSLater for iPhone, a perfect remedy for all those messages that you wanted to send, but never actually got around to typing. This simple and intuitive mobile application serves as a time-planning tool, allowing you to type the messages in advance and set the date and time when they will be delivered to chosen recipients. Now completely redesigned and equipped with new features.

Oslo, Norway - Instead of setting up reminders to send birthday greetings to your dearest ones, you can now prepare the greetings whenever you have free time and deliver them with a delay, all in one simple step. It doesn't matter if you are in an important meeting while something big is happening - SMSLater will send the prepared message at just the right time to prove you are actively thinking about the people you love. Such a simple tool can make a tremendous impact on your private and personal relationships and help you save a lot of time and energy.

Now completely redesigned and equipped with new features, SMSLater is available for download from the App Store in version 2.0.0. In addition to well-organized screen layout and top-of-the-class interactivity, the update also brings the possibility to send video and multimedia messages. Simplicity is still the main principle at the heart of this application, so finding your way around the interface will not be a problem even for new users. With all the great tools at your fingertips, it is now easier than ever to keep your life in order and make sure your messages always come through.

SMSLater app works on all devices with iOS 5.1 or later, but is optimized for best results on iPhone 5. While the application is free to download, there are a number of premium options that can be unlocked with in-app purchases. With a very competitive pricing model, you can send free email as well.

### Device Requirements:

- \* iPhone and iPod touch
- \* Requires iOS 5.1 or later
- \* 5.4 MB

### Pricing and Availability:

SMSLater 2.0.0 is available for free in the App Store under the Social Networking category. In-app purchases for extra options are a part of the App.
